

Follow this process if you don't have access to the dynatrace : [BizOpsConfigurator](#)

- 1) Download the dashboards of the template:
https://github.com/JLLormeau/dynatrace_template_fr/archive/refs/heads/main.zip
- 2) Import all dashboards (one per one) with the import function

- 3) Recreate the mapping ID

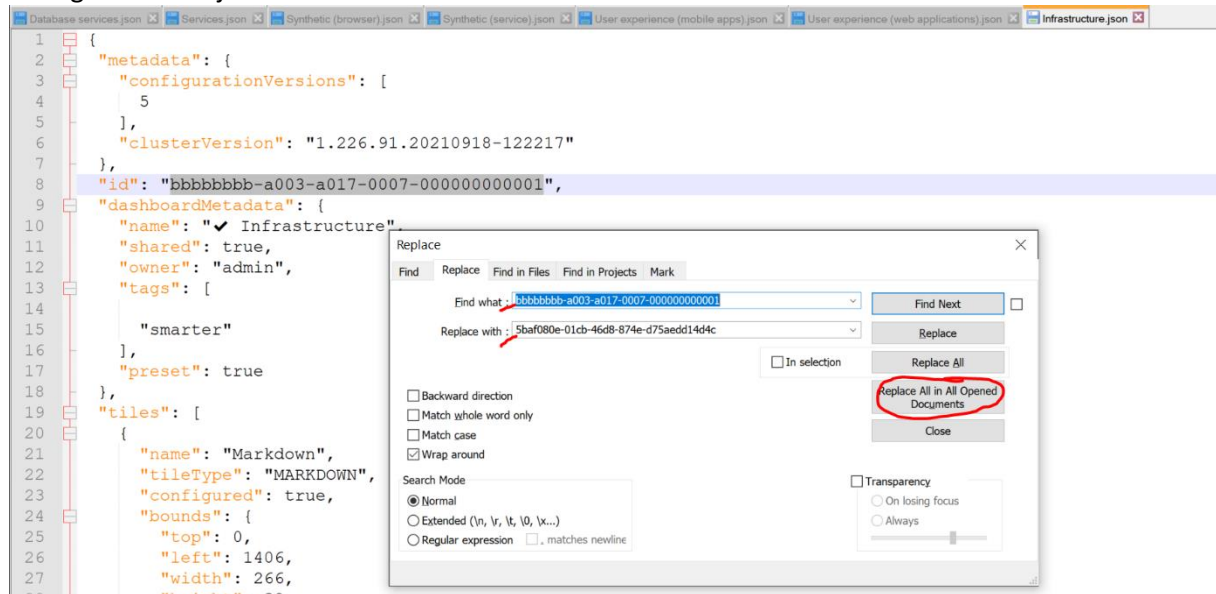

For each dashboard of the template, copy the new dashboard id :

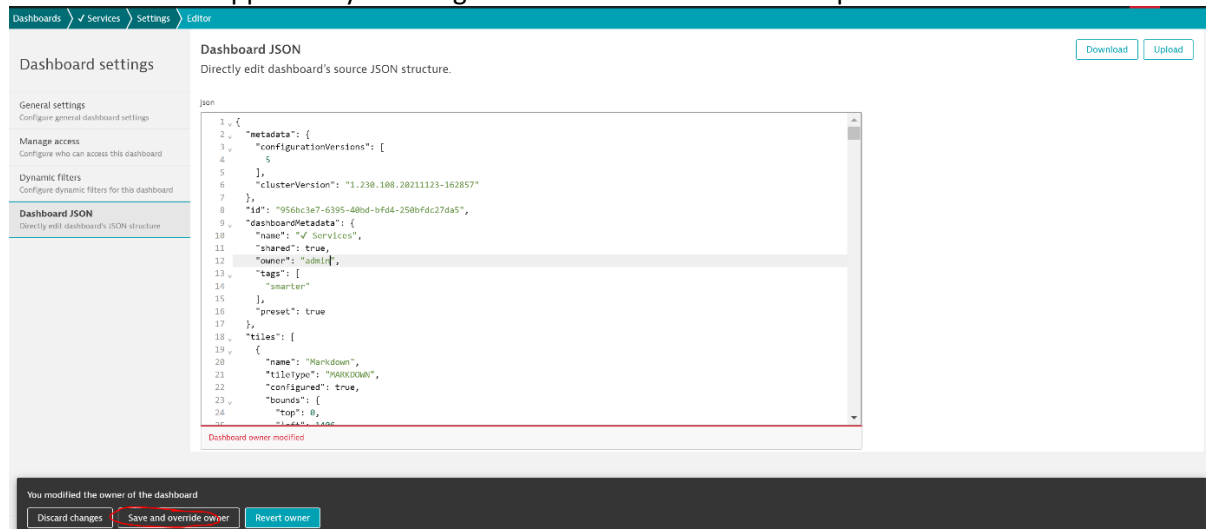

And update the ID table with the old and new ID :

| Name | old ID | New ID |
|------------------------------------|--------|--------|
| Dynatrace: simply smarter | | |
| User experience (web applications) | | |
| User experience (mobile apps) | | |
| Synthetic (browser) | | |
| Services | | |
| Synthetic (service) | | |
| Database | | |
| Database services | | |
| SLO Simply Smarter | | |
| SLO Resource Optimization | | |

4) Open all original json in notepad++
Change ids on all jsons at the same time

5) Edit each dashboard with up-to-date ids:
Share / Advanced Settings / Dashboard Json avec le nouveau json.
You can take the opportunity to change the user to "admin" for example.

6) Validate
Open each dashboard and test each link.
